NAME

  archive_read_new — functions for reading streaming archives

LIBRARY

  Streaming Archive Library (libarchive, -larchive)

SYNOPSIS

  #include <archive.h>

  struct archive *
  archive_read_new(*void*);

DESCRIPTION

  Allocates and initializes a struct archive object suitable for reading from an archive. NULL is returned on error.

  A complete description of the struct archive object can be found in the overview manual page for libarchive(3).
